Mr. Randy Ross
Director of Business Tax
Oklahoma Tax Commission
2501 Lincoln Boulevard
Oklahoma City, Oklahoma 73194

Dear Mr. Ross:

Over the past 3 years, the assistance of Mr. Steve Martin and the staff of the Gross Production Section of the Oklahoma Tax Commission has been invaluable to the Minerals Management Service (MMS) in its efforts to establish proper royalty values for gas from Indian leases in the Anadarko Basin. Particular focus has been placed on the establishment of royalty values for gas with consideration of the highest price paid for a majority of like-quality production in the same field or area, i.e., major portion analyses. Based on conversations and meetings with the Gross Production Section, MMS believes that data submitted on the Gross Production Monthly Tax Report, Report ID: OTC 300-R-7-81, can be utilized in its efforts to establish royalty values in the Anadarko Basin.

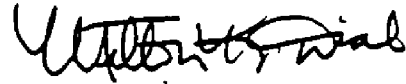

Therefore, MMS requests that it be provided all gas sales information obtained from the above-referenced report concerning all producing entities in the Anadarko Basin for the time period January 1984 through February 1988. We understand that the Oklahoma Geological Survey has agreed to provide the file code for each Production Unit Number (PUN) to the Gross Production Section. This will allow the release of data by field without the PUN attached to the record, thus preserving the confidential status of this data. As our request is limited to the Anadarko Basin, we will need information only for the counties located all or partially in the Anadarko Basin. From the information available to us, these counties include Beckham, Blaine, Caddo, Canadian, Comanche, Custer, Dewey, Ellis, Gavin, Grady, Kiowa, McClain, Roger Mills, Stephens, Washita, and Woodward Counties.

Mr. Randy Ross

MMS-RVS-OG

OCT 07 1991

Mr. Randy Ross
Director of Business Tax
Oklahoma Tax Commission
2501 Lincoln Boulevard
Oklahoma City, Oklahoma 73194

Dear Mr. Ross:

In a letter dated April 1, 1991, the Minerals Management Service (MMS) requested gas sales information found on the Gross Production Monthly Tax Report in an effort to establish proper royalty values for gas produced from Indian leases in the Anadarko Basin. The MMS would like to extend our appreciation for the efforts of the staff of the Gross Production Section, and in particular, Mr. Steve Martin and Mr. Don Frith, for their prompt attention to our request. The information provided by the Gross Production Section has proved to be invaluable in our efforts to establish the royalty values.

Since our initial inquiry, events have transpired which necessitate our acquiring additional gas sales information from the Gross Production Section. It has recently been found that the Indian leases for which MMS must establish proper royalty values are those allotted Indian leases that were issued by the Anadarko Area Office of the Bureau of Indian Affairs. Our previous request was based upon the area defined as the Anadarko Basin. However, this new request is limited to the specific fields identified for those leases located outside of the Anadarko Basin. Therefore, MMS requests that it be provided all gas sales information for the time period of January 1984 through December 1990 for the fields supplied on the attached list. Due to the usefulness of the data supplied for the first request, the data format and method of data transmission provided by your office can be duplicated.

Once again, we at MMS extend our appreciation for your continuing assistance in this project. We apologize for any inconvenience that this additional request may cause. Please contact Mr. John Price at (303) 231-3392 if you have any questions concerning this request.

Sincerely,

Milton K. Dial
Chief, Royalty Valuation and
Standards Division
